

Care Instructions

Cushions & Canopy Fabric

Properties

SunWeave used only high quality, 100% solution-dyed outdoor fabrics for all cushions and canopies. Solution-dyed fabrics offer high resistance to fading, and long life span. As well as soft, breathable, high UV, water & mildew resistant and do not noticeably shrink or stretch. The fabrics are all water and oil repellent.

 Cleaning

Cushion covers should always be removed from the cushion filling prior to any cleaning. Canopy fabrics should always be removed from the frames prior to any cleaning.

For light dirt and dust, fabrics may be cleaned with garden hose or warm tap water and mild detergent.

Machine Washing:

Machine wash on cold water setting (100°F/40°C). Depending on the load size, use normal amounts of a mild laundry detergent. Allow fabric to air dry.

For tougher stains and more thorough cleaning, we recommend using 303 Multi-Surface Cleaner, following the instructions detailed on the label. 303 Multi-Surface Cleaner can be used as a pre wash stain remover and is very effective in cleaning outdoor fabric.

 General Tips

- DO NOT dry clean
 - DO NOT use bleach
 - DO NOT use aggressive detergents
 - DO NOT steam iron
 - DO NOT tumble dry
- Store cushions in a dry location when not in use.
