

Care Instructions

SunWeave HPL

Properties

High Pressure Laminate is a very suitable material for outdoor use. The material is resin-impregnated paper, compressed under very high pressure creating a strong top with a scratch-resistant surface. HPL is light-fast, weatherproof and highly scratch-resistant. These table tops require no maintenance and can remain outdoors all year round.

SunWeave HPL is European made and we offer 10 year warranty on the material.

 Cleaning

With a little care, you can keep your SunWeave HPL Table Tops looking like new for many years.

For routine, general cleaning, clean the table top with a moist microfiber cloth. Most stains can be removed with water and ordinary all-purpose cleaner or household dishwashing detergent.

For tougher stains and more thorough cleaning, we recommend using 303 Multi-Surface Cleaner, following the instructions detailed on the label.

A pressure hose on a low setting is suitable to use on HPL Surfaces.

 Never

Never use abrasive or highly aggressive cleaning products, such as steel wool, scouring powder or other polishes (for home use), to clean HPL tops, as they can scratch the surface and cause irreparable damage to your table top.
