beautifully built

COVER: VIBES LOUNGE SET

MATINA ARMCHAIR

A man and a woman are relaxing on dark-colored wicker lounge chairs on a sandy beach. The man is on the left, shirtless and wearing blue shorts, lying back with his legs extended. The woman is on the right, wearing a blue and white striped bikini, lying back with her legs raised and arms outstretched. They are both smiling and laughing. The ocean is in the background, with white waves crashing onto the shore. The water is a vibrant blue-green color.

sunweave  
loves the sun

SunWeave fiber is resistant to sun, rain, salt & chlorine, making our products not only beautifully designed but also built to last.

# about us

## sunweave international

Working with internationally acclaimed designers and the best modern materials, SunWeave International manufactures furniture of exceptional quality and design.

Founded in 2005 and now carrying more than 100 products, SunWeave is best known for its innovative and efficient approach to producing attractive woven furniture that transforms outdoor areas into sophisticated, relaxing spaces. This furniture looks equally spectacular indoors.

Building upon the management team's experience with the outdoor furniture industry and technology, SunWeave has streamlined the production and packaging of its outdoor furniture to keep prices affordable without sacrificing quality or its commitment to good design.

## built to last

Using traditional hand-weaving techniques, modern woven furniture is created from SunWeave fiber, which is resistant to sun, rain, salt and chlorine and will also stand up to food and drink spills. Structural strength is provided by top quality powder-coated aluminium.

Sunbrella® covered cushions add extra comfort and are also tough enough to cope with the wear and tear of outdoor living. Textiles are from FERRARI including Batyline® and provide a comfortable, easy to clean and UV resistant material that is robust, and exceptionally comfortable for outdoor furniture.

## manufacturing

Production is centered in Asia, where SunWeave's design and quality control team monitor every step of the process. Only the very best materials that can cope with all weather conditions, in any location, are selected and all SunWeave furniture is tested for comfort, ergonomics and durability.

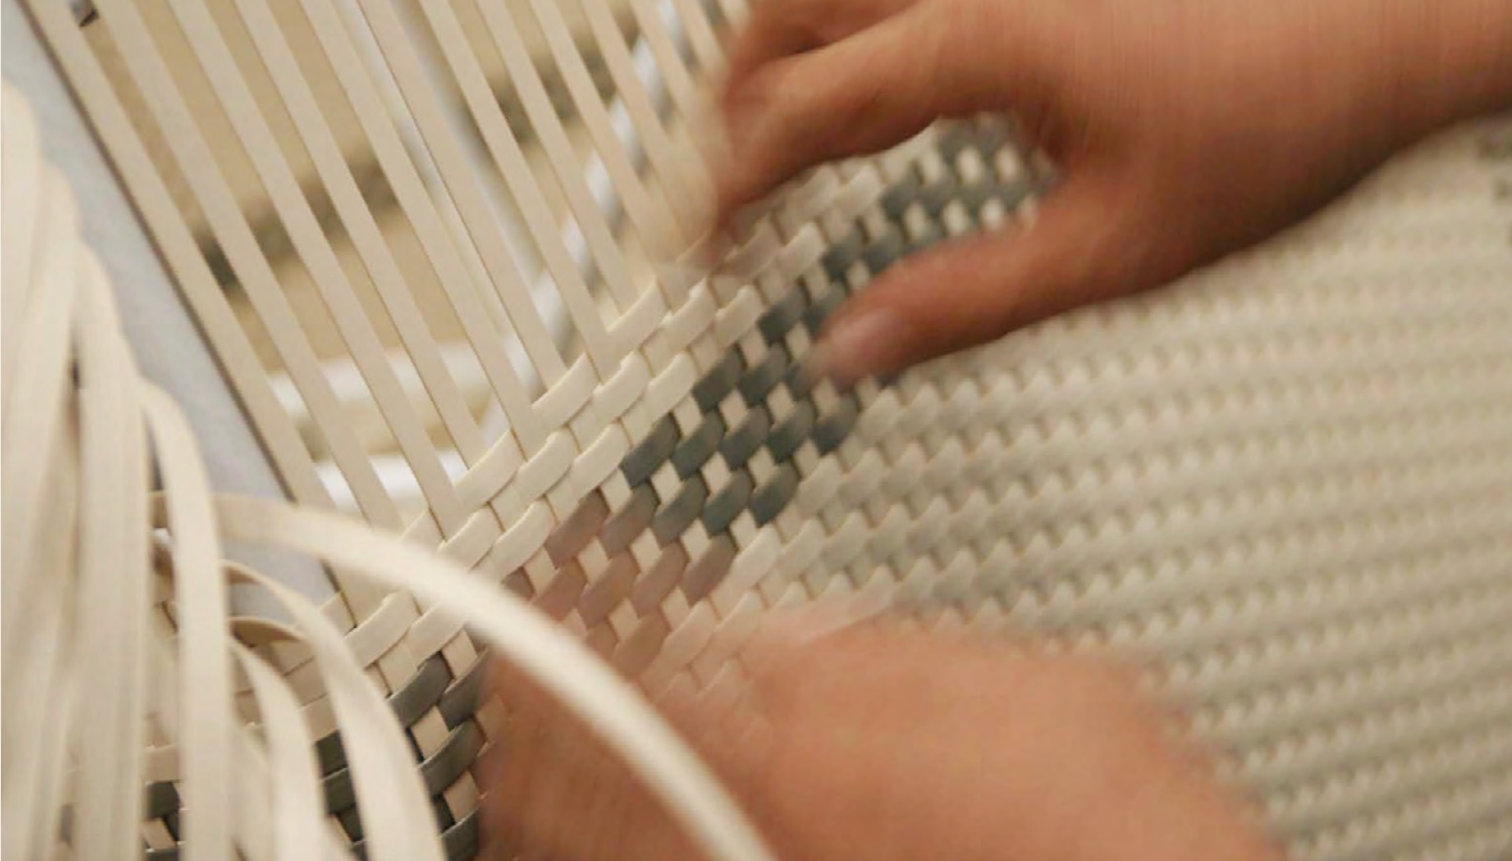

## the environment

The wellbeing of our planet is important to us all. At SunWeave our raw materials are 100% recyclable. We do our utmost to supply sustainable quality furniture that considers the precious resources on our planet.

weaved by  
expert craftsmen

## built to last

### construction

All our products are hand crafted to perfection from the inner core to the exterior finishes. Our woven products use SunWeave fibers on the exterior with aluminum tube frames within.

Sunbrella® fabric is used for all cushion manufacture and ensures that the residential or commercial customer enjoys that extra level of comfort. Sunbrella® fabrics are UV, chlorine and stain resistant with a range of beautiful colours making it the leading choice for outdoor use.

### care

Outdoor furniture endures the harshest environments. From the chilling snows to the scorching heat our products can withstand these extremes with ease. Our carefully selected materials ensure low maintenance of outdoor furniture in the home or commercial environment. Simple water based cleaning will remove the buildup of everyday environmental stains. No advanced chemicals are required. In the event your cushions do get wet, the cushion covers should be dried separately from the filling. The use of the Sunbrella® fabric for cushion covers means that they can be machine washed.

## original design

### Outdoor furniture is harder to produce than regular furniture.

Outdoor furniture is harder to produce than regular furniture. This is predominantly due to the harsh environment that outdoor furniture must endure on a daily basis. Raw material selection and the manufacturing process are incredibly important as they are the building blocks of the design and ultimately the finished product.

SunWeave provides Original Design Manufacturing (ODM) capabilities to customers who are seeking a partner in Asia with outstanding capabilities in outdoor furniture and accessories production. The ODM model allows brand firms to produce without the need to engage in the operation of a factory or related services.

Our expert production and manufacturing team can handle all aspects of production (from concept through to high volume production) for multiple clients with multiple designs and brands.

If your company is a medium or large enterprise focusing on retail, wholesale or procurement our manufacturing team can deliver your outdoor products on time using your choice of materials, design and brand. Our experts can help you meet the needs of your market.
